

BACnet MS/TP to BACnet IP Router

Integrate BACnet MS/TP with BACnet IP devices with our BACnet Router. It is a compact BACnet multi-network device which provides smooth routing between BACnet/IP and BACnet MS/TP networks. The aim of this integration is to make accessible BACnet devices, its objects and resources independently of the BACnet network they are connected.

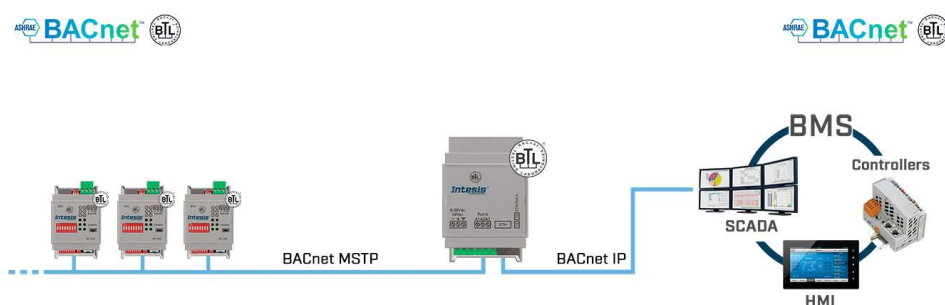

FEATURES

- UL Certified
- BTL Certified
- Support for up to 32 full-load MS/TP devices
- Support for BBMD network role
- BACnet Explorer feature
- BACnet network diagnose signals available in MAPS and as BACnet objects
- Easy integration & updates with Intesis MAPS

Use Case

Integration of BACnet MSTP Devices into BACnet IP example.

Description

This router provides a straightforward and fast integration thanks to its unique onboard features.

The BTL mark ensures 100% compatibility and, at the same time, guarantees a seamless integration with any BACnet device.

The configuration is carried out using the Intesis MAPS software. This one allows you to define your own settings for the device. Also, it will be able to download all the available project templates or to import any created/exported project template on your computer.
