# KNX TP to BACnet IP & MS/TP Server Gateway

Integrate any KNX device or installation, with a BACnet BMS or any BACnet IP or BACnet MS/TP controller. The aim of this integration is to make accessible KNX communication objects and resources from a BACnet based control system or device, as if it was a part of the own BACnet system and vice-versa.
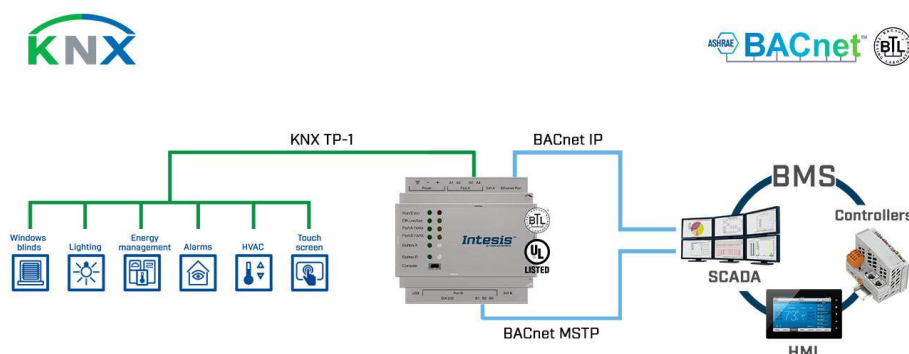

FEATURES

UL Certified
BTL Certified
Support for BACnet IP Client
BACnet Advanced features available (Trend logs, Calendars, etc.)
Support for KNX TP devices.
Control up to 3000 KNX communication objects.
Easy integration & updates with Intesis MAPS

Use Case

Integration of KNX Devices into BACnet Gateway example.

Description

This bidirectional gateway provides a straightforward and fast integration thanks to its unique onboard features.

The BTL mark ensures 100% compatibility and, at the same time, guarantees a seamless integration with any BACnet device.

The configuration is carried out using the Intesis MAPS software. This one allows you to define your own settings for the device. Also, it will be able to download all the available project templates or to import any created/exported project template on your computer.
