

Universal IR Air Conditioner to Home Automation Interface

The Universal InfraRed (IR)-ASCII gateway allows a complete and natural integration of any Air Conditioner unit (with an infrared receiver) into IP based Home Automation Systems.

FEATURES

Intuitive web interface for the WiFi configuration.

b/g/n WiFi standards supported.

Quick and easy installation (plug and configure the WiFi).

Auto-Learn function to automatically set the IR remote controller configuration.

Simultaneous control of the AC unit by the IR remote controller and by Home Automation systems. Integration with any IP Home Automation System thanks to our open ASCII protocol.

Compatible with the drivers available in Intesis webpage

AC BRAND

Home
Automation

Use Case Integration of Universal IR Air Conditioners Units into a Home Automation installation.

Home
Automation

Drivers availables for:

INFRARED COMMUNICATION WITH THE INDOOR UNIT

The gateway allows the control of the main AC functions via infrared commands. But also, thanks to the IR receiver that the device is equipped with, it is possible to know the real status of the AC unit even the user is controlling it by the manufacturer IR remote controller.

THE SOLUTION

The Intesis Home Automation gateways have been specifically designed to be the best AC integration solution for Home Automation Systems. Communications are based on a simple ASCII protocol that can be easily implemented, in the form of a driver, into Home Controllers or Smart Hubs. With drivers already available from many Home Automation platforms on the market, Air Conditioning units can be easily integrated and controlled.
